

TRACE-X Investigation Report

Case: Reported crypto investment scam (case-demo-001)

Investigator: demo.investigator

Generated: 2026-09-05T20:28:32.345475+00:00

Suspect Wallet

0xVICTIM000000000000000000000000000000A1

Transaction Summary

Total transactions traced: 96 | Distinct addresses involved: 12 | Total value out from suspect wallet: 16010.64

Fund-Flow Path(s)

0xVICTIM000000000000000000000000000000A1 → 0xBURNER_0000A1 → 0xINTER1_0000A1 → 0xINTER3_0000A1 → 0xEXCHANGE_KRAKENISH_HOT1

0xVICTIM000000000000000000000000000000A1 → 0xBURNER_0000A1 → 0xINTER1_0000A1 → 0xINTER3_0000A1 → 0xEXCHANGE_KRAKENISH_HOT1

0xVICTIM000000000000000000000000000000A1 → 0xBURNER_0000A1 → 0xINTER1_0000A1 → 0xINTER3_0000A1 → 0xEXCHANGE_KRAKENISH_HOT1

0xVICTIM000000000000000000000000000000A1 → 0xBURNER_0000A1 → 0xINTER1_0000A1 → 0xINTER3_0000A1 → 0xEXCHANGE_KRAKENISH_HOT1

0xVICTIM000000000000000000000000000000A1 → 0xBURNER_0000A1 → 0xINTER1_0000A1 → 0xINTER3_0000A1 → 0xEXCHANGE_KRAKENISH_HOT1

Risk Score

Score: 23.84 / 100 — Level: LOW — Confidence: 0.3

Feature	Contribution (of 100)
burstiness	0.07
hop_evasion	0.0
fan_out	7.8
fan_in	0.0
velocity	0.0
value_concentration	9.97
counterparty_diversity	3.5
known_risk_label	0.0
cluster_proximity	2.5
routing_irregularity	0.0

Evidence:

- No strong individual signal fired; score reflects a weighted combination of weak structural indicators only.

Likely VASP Attribution

Krakenish Exchange (mock) — confidence 58% (source: mock_vasp_registry_v1, last verified: 2026-08-01T00:00:00)

+ Direct on-chain path found: 0xVICTIM000000000000000000000000000000A1 -> 0xBURNER_0000A1 -> 0xINTER2_0000A1 -> 0xEXCHANGE_KRAKENISH_HOT1 (3 hop(s))

+ Address tagged by mock_vasp_registry_v1 as a Krakenish hot wallet

+ Receives from >500 distinct counterparties (deposit-hub pattern)

+ Entity label confidence from mock_vasp_registry_v1: 0.90

This is an evidence-based hypothesis, not a confirmed identification. Confidence decays with hop distance and with any funds routed through unresolved mixers/bridges.

Recommendations

- Issue a preservation/production request to Krakenish Exchange (mock) for KYC records on the receiving deposit address (attribution confidence 58%).
- Flag intermediary wallet(s) 0xBURNER_0000A1, 0xPEER_0000A1, 0xINTER1_0000A1, 0xINTER2_0000A1, 0xINTER3_0000A1, 0xEXCHANGE_KRAKENISH_HOT1, 0xBURNER_H_HOT1, 0xPEER_H_HOT1, 0xINTER1_H_HOT1, 0xINTER2_H_HOT1, 0xINTER3_H_HOT1 for cross-case correlation — reused laundering infrastructure often recurs across victims.

Limitations & Uncertainty

- This attribution is a data-driven hypothesis, not a confirmed identification, and is not admissible as sole evidence.
- Fund tracing cannot be guaranteed complete through unresolved mixers, cross-chain bridges, or privacy-preserving protocols.
- No live connection to NCRP/SAHYOG was used; integration adapters are mocked pending credentialed government API access.
